EDUCATION

Pillai College Of

Arts, Commerce & Science

B.Sc in Computer Science |

CGPA-9.25

May 2023 | New Panvel, Navi

Mumbai

PVG's Vidya Bhawan Jr.college

12th Science

March 2020 | Nerul, Navi Mumbai

Terna Vidyalaya

10th

March 2018 | Nerul, Navi Mumbai

SKILLS

Programming Languages

Java | Python | HTML |

CSS | JavaScript

Libraries/Frameworks

JSP | React js | Rest API

Databases

SQL | Oracle PL/SQL

Development

Web | Android

UI/UX Design

Adobe XD | Figma

Data Analytics

Python | Numpy | Pandas

| Matplotlib | Seaborn | Nltk

| Power BI

EXPERIENCE

TCS | Data Analyst Intern

Jun 2023 – Aug 2023 | Hybrid

- Created Interactive **Power BI** Dashboard to analyze employee data from different sources, such as HR files, performance reviews, and employee surveys. The analysis looks at things like attrition rates, job satisfaction, and employee demographics.

Let's Grow More | Android Developer Intern

Jan 2023 – Feb 2023 | Online

- **Create an android application Covid tracker**
Designed layouts for the activities. Work on the Activities code. Integrate the **covid API**. Tested App according to the requirements. Add all details about covid cases of each country. Add all details about covid cases of each state of india.
- **Create an android application face detection**
Designed layouts for the activities. Work on the Activities code. **Integrate the API**. Test whether the app detects the faces from the camera and photo. Tested the app according to the requirements.

PROJECTS

Fleet Management Website | GITHUB

HTML | CSS | JSP | PL/SQL

By using **jsp, pl/sql, Oracle Database**, I created a site where Business owner handle all business stuff and customer also handle all his activities so that's is basically user friendly and multipurpose software. Fleet Management Website is to maintain an accurate and up-to-date overview of vehicle diagnostics, geolocation, and identifying risky or unsafe driver behaviors while simultaneously reducing manager workload. & Maintain All Fleet Work It is Easy to Handle and Manage, User Friendly

EMPLOYEE ATTRITION & PERFORMANCE ANALYSIS

| GITHUB

POWER BI | DATASET

I Worked On Employee Attrition Data set and Finding the Insights of it. and Also Visualized the Data in **Power BI** to understand the Insights and Make Quick Decisions From It. The purpose of visualizations is to display pertinent metrics and encourage interactive exploration. This report presents the analysis's conclusions and key learnings.

GOLD PRICE PREDICTION USING ML MODEL (RANDOM FOREST REGRESSION) | GITHUB

Python | Google Colab | Numpy | Random Forest Regression ML | Matplotlib | Pandas

In this project would forecast gold rates using the most comprehensive set of features and would apply various **machine learning algorithms** for forecasting and compare their results. We also identify the attributes that highly influence the gold rates. Forecasting rise and fall in the daily gold rates, can help investors to decide when to buy (or sell) the commodity.

Library Management Android Application | GITHUB

Java | Android Studio | XML | DBHelper | SQLite

Library Management App is a tool for library management people. Using the app, the admin of the library can upload book details and where it is located and then if want then update it or delete. Basically It is a App which can Perform **CRUD** Operation.
